

Perkin+Wills Class Lecture

- How do we get information about our clients?

Questionnaire, Presentation and interviews. Also by practical hands on experience. Perform walk around examinations. Check during different times, and through different kinds of patients.

- What are the things which go wrong?

Cost, short-sightedness, regulatory constraints.

- How can we make them right?

People from all the streams, medical providers, design experts, and through survey from patients themselves.

Many of their projects(hospital design) were discussed. In particular the Florida Hospital and the renovation project were interesting.
